

Exceptional care

Promedica24 provide 24 hour live-in Care Workers. They assist with everyday tasks like cooking, cleaning and personal care. With this help, patients can be safely discharged to the comfort of their own home, with the support they require.

How Promedica24 can enhance the discharge process

1. We are CQC registered and undertake care assessments for each person we support.

2. We can have live-in care in place in three to five days.

3. We choose the Care Worker based on the needs and interests of the person we support.

We can swiftly arrange live-in care. Our Care Workers come with knowledge and experience to support specific health and recuperation needs.

Although we respond quickly, the people we support are still able to consider a suitable selection of Care Workers.

We appreciate our care assessment cannot replace the discharge assessment you carry out. It can however assist and be used as a guide to speed up the work you undertake.
